Cost: \$25

You will receive:

*The Project Learning Tree
Curriculum Guide, the Healthy
Water, Healthy People
Educators Guide & Test Kit
Manual, and many other
educational tools!*

Prolonged drought in the Southwest United States has compromised our forests and water resources. Instilling an awareness of these two natural resources in our students can encourage a lifelong commitment to natural resources. Aligned with state academic standards, Arizona Project WET (<http://ag.arizona.edu/azwater/wet/standards/index.html>) and Project Learning Tree provide tools to bring the environment into your classroom.

Join us at the Arboretum at Flagstaff for a combined Arizona Project WET and Project Learning Tree workshop focusing specifically in Arizona.
